

As a traveling nurse, student, and commuter, I travel the highway frequently and use my XM radio travel reports religiously. They provide me with excellent and timely information that keeps me well informed as well as keeping me from becoming behind during my travels. The local radio stations spend too much time laughing, talking, and advertising local events rather than providing the much needed traffic reports. This is why I feel that XM radio should be allowed to continue broadcasting the traffic reports as they currently do. Please reject petition 04-160 and please support XM radio's ability to provide this and other much needed programming. Thank you for any help you can provide in this matter.
